

Technical memo number 5—May 27, 2005

NAMING CROSS-REFERENCE

Matt Gray, University of Minnesota

(If you use information or advice from this memo, please acknowledge it and the net site <http://etacar.umn.edu/> in any resulting publications; thanks)

1. Introduction

The following is a list matching various file naming versions to the latest version. The first naming convention was based on the ordering of the observations as they were presented to the Eta Car group; all such files are prefixed with ‘x’ to denote this early version.

When the next version of the data arrived, the files were named similarly to the x series, although in ascending order by MJD. This version is termed ‘1.0’. Finally, a new naming scheme was developed¹; this is the third column.

The final column provides the fractional date for reference.

2. The list
